

LUCAS CUNHA

DevOps & Infrastructure Lead

lucascmir@gmail.com | lucas-cunha.com | linkedin.com/in/lucmir | Belo Horizonte, Brazil

EXPERIENCE

DevOps & Infrastructure Lead Civic Technologies

04/2025 (1 yr)

- Lead cloud infrastructure, observability, and scalability across Civic products on AWS.
- Operate EKS with GitOps deployments; build CI/CD pipelines and infrastructure-as-code (CloudFormation, Docker, GitHub Actions).
- Own end-to-end observability (New Relic, Grafana, Prometheus, distributed tracing), incident response, and cloud cost optimization.
- Contributed to analytics pipeline implementation (Kinesis, Lambda, Redshift).

Full-Stack Engineer Civic Technologies

11/2018 – 04/2025 (6.5 yrs)

- Full-stack delivery across Civic's identity and auth platform (OAuth 2.0/OIDC, Next.js, React, Node.js).
- Built Civic MCP: an AI agent control plane on Model Context Protocol, connecting agents to enterprise tools with guardrails and audit logging.
- Shipped Civic Pass: on-chain identity credentials on Solana and EVM chains — scaled to 1M+ passes issued.
- Built Civic Wallet APIs (Node.js, Serverless, AWS Lambda) for crypto wallet and payments.

Developer Consultant ThoughtWorks

06/2016 – 11/2018 (2.5 yrs)

- Designed a Digital API-management Platform (Kong, Rails, Node.js, GCP, Kubernetes) for secure, scalable cross-team API consumption.
- Developed a staffing system (React/Redux, Rails, AWS); led technical decisions, mentoring, and delivery quality.

Software Engineer Imaginie

03/2015 – 06/2016 (1 yr)

- Built a web and mobile distance-education platform (Python/Django, AngularJS, Ionic); owned deployment, monitoring, and CI/CD on AWS (Docker, Ansible).

Software Engineer Samba Tech

01/2010 – 02/2015 (5 yrs)

- Built an Online Video Platform and a distance-education app (Django); owned infrastructure automation, deployment pipelines, and monitoring (AWS, Nagios, Graphite, Fabric).

LANGUAGES

English (Professional Working)

Portuguese (Native)

SUMMARY

Senior Full-Stack Engineer with 15+ years across full-stack delivery, AWS/Kubernetes platforms, identity, and Web3. Currently leading DevOps and infrastructure at Civic Technologies, and building AI-powered products and agent-based systems, including MCP integrations that connect agents to enterprise tools.
